Outcome based solutions

## Meet the evolution of healthcare head-on

---

As today's healthcare landscape continues to evolve, frontline healthcare professionals are taking on more responsibilities amid high turnover and a less-experienced workforce.<sup>1,2</sup> At Stryker, we recognize the strain these challenges place on care teams and their potential impact on patient outcomes.

ProClinical provides clinical experts that help prioritize people, elevate your products, optimize your processes and leverage timely data for a comprehensive approach to drive better patient outcomes.

## Turn data into action

There's plenty of data in healthcare, but meaningful, relevant and timely data is hard to come by. ProClinical's sophisticated tools collect key information efficiently and our dashboard translates data into viewable, understandable and actionable insights that empower improvement.

## Elevate patient care with ProClinical

Empower your hospital with more than just numbers. Contact your account manager and discover a data-driven partnership to help you achieve your goals.

Our solutions go beyond data – it's a true partnership. Our team of experts are focused on enabling, empowering and equipping care teams to improve and sustain outcomes.

## Here's how it works:

### Collaborate and develop goals

First, we work together to understand your unique challenges, share successful strategies and global best-practices for your consideration and establish measurable goals. This ensures our efforts are concentrated where they matter most.

### Review protocols and practices

Next, we'll execute our scheduled visits and perform ongoing comprehensive assessments of your facility and workflow practices with our mobile application.

### Analyze data and identify insights

Then, we utilize our advanced analytics and comprehensive dashboard to generate customized reports with key insights for action planning.

### Implement an action plan

In partnership with key stakeholders, we deliver targeted, data-driven interventions to areas with the greatest opportunity and celebrate the achievements of high-performers.

### Support long-term success

Ultimately, our goal isn't to help you achieve one week or one month of improved outcomes, it's to create sustainable changes that improve patient care and create a tangible culture of quality and safety.
