

# TruRize Clinical Chair

The next step in mobility.

## The next step in mobility.

Early patient mobility is a crucial component during the recovery process hence its importance to a patient's health and recovery must be emphasised.<sup>1</sup>

TruRize is designed to help promote early patient mobility and give caregivers the assurance they need to confidently mobilise their patients.

- Simple, user-friendly technology makes patient handling easy for caregivers.
- Powered-pivoting design guides the movement of TruRize into positions that help promote patient comfort.
- An industry first integrated chair exit alarm system may help to shorten response time to patient falls.\*

**Stand assist function** supports the patient to a standing position, helping to promote early patient mobility.

### Pivoting armrests

### Caregiver control panel

### Vertical transportation handles
