

Facial iD

3D Printed patient specific plating

Orthognathics

**Midface and
mandible trauma**

Midface reconstruction

Facial iD

3D Printed patient specific plating

VSP by 3D Systems

Provides expertise in pre-surgical planning, patient specific models, guides and templates.

Design flexibility

Allows for variation in implant complexity and choice of screw diameter to fit your surgical needs.

Enhanced visualisation

Receive real time feedback while precisely planning screw hole location, bar width and plate thickness around critical anatomy.

Intraoperative modification

Implants are made of commercially pure titanium and slight changes can be made intraoperatively.

Craniomaxillofacial

This document is intended solely for the use of healthcare professionals.

A healthcare professional must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that healthcare professionals be trained in the use of any particular product before using it in surgery.

The information presented is intended to demonstrate the breadth of Stryker product offerings. A healthcare professional must always refer to the package insert, product label and/or instructions for use before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.

Stryker Corporation or its divisions or other corporate affiliated entities own, use or have applied for the following trademarks or service marks: Facial iD, Stryker. All other trademarks are trademarks of their respective owners or holders.

The products depicted are CE marked in accordance with applicable EU Regulations and Directives.

This material is not intended for distribution outside the EU and EFTA.
