

# Cervical Spine Solutions

## Stryker education

Didactic and Cadaveric Lab training on:

### Advances in technologies and techniques

---

**The goal** of this course is to provide training and education in the safe and effective use on the latest cervical spine systems.

In addition to fusion techniques with ventral plates or dorsal screw-rod systems, vertebrectomies with in situ distractable vertebral body replacements and non-fusion techniques with artificial intervertebral discs will be shown.

**Find out** from international top surgeons which treatment algorithms they trust and how they deal with complications that arise.

**Follow** in this highly interactive course, not only the basic lectures, but also participate in varied, exciting case discussions.

**Practice** using the latest technologies and techniques on high quality human donations under the guidance of the surgical experts and receive first-hand tips and tricks.

**Save the date!**

**September 1<sup>st</sup> & 2<sup>nd</sup>**

**Amsterdam Skills Centre**
