

Emergency Care

clinical and product training

Clinical training

Speaker **Tim Phalen, BS, Author**

Timing Pre-sale or post-sale

Target Prehospital or Acute Care:
General training for a more diverse hospital audience needing education on 12-lead ECG, capnography or CPR effectiveness.

Courses Select on-site clinical courses:

- Acute Coronary Syndrome
- 12-leads made easy
- 12-leads made easy: STEMI essentials
- 12-leads made easy: For EMTs
- 12-leads made easy: Instructor program
- Capnography made easy

Lead Time Pending schedule

CE Content provided to customer for CE application

Provider **Medtronic**

Website www.capnographyeducation.com

Courses Select from:

- Riding the growing wave of capnography
- Capnography competition—crash cart/rapid response
- Capnography—selling beyond the crash cart

Speaker **Nicole Kupchik, RN, MN, CCNS, CCRN, PCCN**

Timing Pre-sale or post-sale

Target Prehospital or Acute Care:
Tailored training for hospital response teams, code committees or buying groups needing education on CPR effectiveness and capnography.

Courses Select on-site clinical courses or via webinar:

- An evidence-based approach to cardiac arrest & resuscitation
- Improving outcomes from cardiac arrest
- Incorporating waveform capnography into a resuscitation program
- Improving shock success
- Targeted temperature management after cardiac arrest
- Sepsis
- Functional hemodynamics
- End points of fluid resuscitation
- Acute coronary syndrome
- Heart failure
- 12-lead ECG interpretation
- Emergent pacing

See your Stryker account manager for information on costs associated with courses.

Clinical training continued

Speaker **Mike McEvoy, PhD, RN, CCRN, NRP**

Timing Pre-sale or post-sale

Target Prehospital or Acute Care:
Tailored training for specific hospital response teams, code committees or buying groups needing education on CPR effectiveness and capnography.

Courses Select on-site clinical courses:

- Guidelines and Standards from the Joint Commission, AHA and ILCOR
- Cardiac arrest management
- Rapid Response Teams and Medical Emergency Teams
- Resuscitating patients post-cardiac surgery
- Carbon monoxide, methemoglobin
- Keep abreast and ahead of standards for resuscitation equipment
- Measuring the effectiveness of CPR and evaluating resuscitations
- Capnography: The window into your patient
- Shock right the first time
- Critical care and hemodynamic monitoring

Lead Time Pending schedule

CE Content provided to customer for CE application

Speaker **Medtronic capnography training**

Timing Pre-sale or post-sale

Target Acute Care:
Training is designed for "Train the Trainer" and is targeted at Respiratory Therapy, Anesthesia, Nursing Educators, and Key Nursing personnel. The focus is to train hospital personnel that will be able to continue to train staff level clinicians (nursing staff is not excluded).

Courses Select on-site clinical courses:

- Capnography basics
- Basic waveform understanding
- Guidelines for both intubated and non-intubated applications
- FilterLine® review
- Role of capnography in CPR and emergency cardiovascular care

Lead Time 6 week minimum lead time for approval and scheduling

Provider **Stryker Learning Center (CE credits available)**

Website <http://www.physiouniversity.com>

Target Prehospital or Acute Care:

Courses Select online clinical courses:

- Capnography made easy
- 12-leads made easy

Cost No charge
Sign up for courses at <https://www.strykeremergencycare.com/learn-and-train/>

Hospital or EMS agencies can access courses at no charge.

CE 12-lead made easy: 6-hour CE credit course
Capnography made easy: 5-hour CE credit course

Clinical training continued

Speaker	Medtronic capnography training
Timing	Post-sale
Target	Prehospital: Peer-to-peer paramedic education program.
Topics	On-site visit includes: <ul style="list-style-type: none"> ▪ Capnography overview ▪ Physiology ▪ Oxygenation vs Ventilation ▪ Understanding the waveform ▪ Case studies demonstrating intubated and non-intubated uses in EMS ▪ Peer discussion of protocols and implementation of capnography ▪ Use of capnography for the early identification of Sepsis
Lead time	6 week minimum lead time for approval and scheduling

Speaker	Medtronic capnography training
Website	www.capnographyeducation.com
Target	Prehospital or Acute Care
Courses	Select online clinical courses: <ul style="list-style-type: none"> ▪ A Guide to capnography during procedural sedation ▪ A Guide to monitoring EtCO₂ during opioid delivery ▪ Capnography for the intubated and non-intubated patient ▪ Capnography for the intubated patient in prehospital care ▪ Capnography for the non-intubated patient in prehospital care ▪ Capnography monitoring ▪ Understanding the basics ▪ Capnostream bedside monitor buttonology ▪ Guide to capnography in the management of the critically ill patient Integrated Pulmonary Index (IPI) ▪ Use of capnography for the early identification of Sepsis

Clinical educational materials

Topic	Order number	Title
12-lead STEMI	3316930	What you should know: Prehospital 12-Lead ECG booklet
12-lead STEMI	3304790	DIAG frequency response necessary to reproduce ST segment
12-lead ECG	3328841	Minimizing ECG artifact poster
12-lead ECG	3306627	Minimizing ECG artifact guide
12-lead ECG	3329000	ECG electrode placement (AHA labels)
12-lead ECG	3323919	ECG lead placement and lead reversal guide (AHA labels)
Noninvasive pacing	3312527	Clinical article: Noninvasive pacing, an evidence-based approach
Noninvasive pacing	3312427	Clinical article: Noninvasive pediatric pacing of children
Noninvasive pacing	3312426	Clinical article: Pacing artifact may masquerade as capture
Noninvasive pacing	3312425	Clinical article: Noninvasive pacing capture
Airway & Breathing	3305535	Capnography made easy
