

# LIFENET<sup>®</sup> Care

## Stryker's next-generation patient data communication platform.

Making treatment and care decisions from multiple data sources wastes precious time, creates extra work and challenges your performance goals.

Now, there's a better solution to help deliver faster, more enhanced care. Consolidate patient data, organize your workflow and connect care teams for all types of patient events with LIFENET Care.

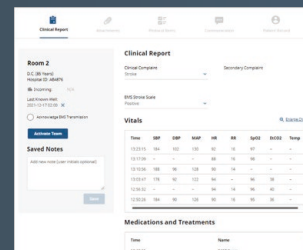

## Get a unified view of the patient journey

Anywhere. Anytime.

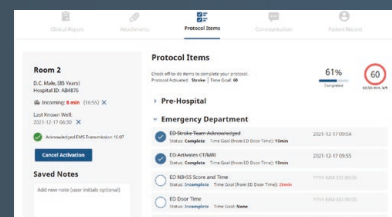

### Consolidate

- Improve patient hand-off across care teams with consolidated data in a single, web-based platform.
- Speed up care with faster patient navigation for a variety of non-emergent events and critical emergencies.<sup>1,2</sup>

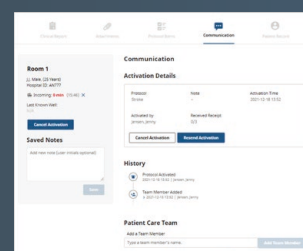

### Organize

- Adapt to your workflow and streamline reporting with custom checklists.
- Reach care milestones with configurable time goals to help comply with protocols and accreditations.

### Connect

- Easily activate care teams for any patient event with custom alerts based on your workflow.
- Boost your confidence with tracked time stamps and improved team communication.

## Before and after

|   | LIFENET Alert | LIFENET Care |
|---|---------------|--------------|
| Custom event alerts and activations           | ●             | ●            |
| Custom time stamps                            | ●             | ●            |
| Accept or decline protocol activations        |               | ●            |
| Protocol summary accreditation help           | ●             | ●            |
| Consolidate multi-source data into one record |               | ●            |
| Add new patients without device transmission  |               | ●            |
| Access anywhere via browser-based login       |               | ●            |
| Track care team goals in near real-time       |               | ●            |
| Start or cancel care team protocols           |               | ●            |
| Configure checklists for all patient events   |               | ●            |
