

ViaFlow®

Flowable Placental Tissue Matrix

Technology overview

ViaFlow and ViaFlow C are flowable placental connective tissue matrices intended for homologous use to supplement or replace damaged or inadequate connective tissue.

There's power in the processing

ViaFlow and ViaFlow C utilizes the novel HydraTek Process to maximize the preservation and the natural biologic potential that the entire placenta has to offer. Through this process, the rich tissue matrix creates an ideal environment that can be precisely applied to areas of damaged connective tissue.

The HydraTek Process surpasses the FDA and AATB standards to provide the utmost in patient safety and preservation of native placental tissue allograft products*.

ViaFlow Matrix

Injectable and intended to target defects quickly and precisely

Room temperature format

5-year shelf life at ambient temperature (10-30°C)

Convenient storage and ready to use out of the box

Available for office consignment

ViaFlow C Matrix

Injectable and intended to target defects quickly and precisely

Cryopreserved format

5-year shelf life at -40°C

Thaws in 5-10 minutes for rapid use

Drop shipped for easy accessibility

Adhering to strict safety standards, HydraTek obtains its source tissues from healthy mothers who are under the care of a licensed OB/GYN physician at a partner facility. All donations are sourced from U.S.-based donors, and only after live, healthy cesarean birth delivery. No maternal or fetal tissues are collected during the process. Intensive safety testing is used to screen both the donor and donated tissues before processing.

Ordering information

ViaFlow | Flowable Placental Tissue Matrix

AMAF-0005	ViaFlow Matrix	0.5cc
AMAF-0010	ViaFlow Matrix	1cc
AMAF-0020	ViaFlow Matrix	2cc

ViaFlow C | Cryopreserved Flowable Placental Tissue Matrix

AMCF-0010	ViaFlow C Matrix	1cc
------------------	------------------	-----

Note:

- All ViaFlow Flowable Matrices products stored at ambient temperature have a 5-year shelf life.
- All ViaFlow C Flowable Matrices products stored at -40C or below have a 5-year shelf life. (ViaFlow C Matrix may be stored at -20C; however, the shelf life decreases to 6 months.)

Trauma & Extremities

This document is intended solely for the use of healthcare professionals. A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. We do not dispense medical advice and recommend that surgeons be trained in the use of any particular product before using it in surgery.

The information presented is intended to demonstrate Stryker's products. A surgeon must always refer to the package insert, product label and/or instructions for use, including the instructions for cleaning and sterilization (if applicable), before using any of Stryker's products. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your representative if you have questions about the availability of Stryker's products in your area.
