

SONOPET[®]

Ultrasonic Aspirator

SONOPET Ultrasonic Aspirator delivers optimal flexibility for you, your team and your patients. It's precise, easy to use and remarkably versatile. In one high-performance system, you get unparalleled control in soft-tissue applications—plus the nuanced power you need for fine bone dissection. Regulate ultrasonic power, suction and irrigation easily from the console.

Precise, versatile, easy to use

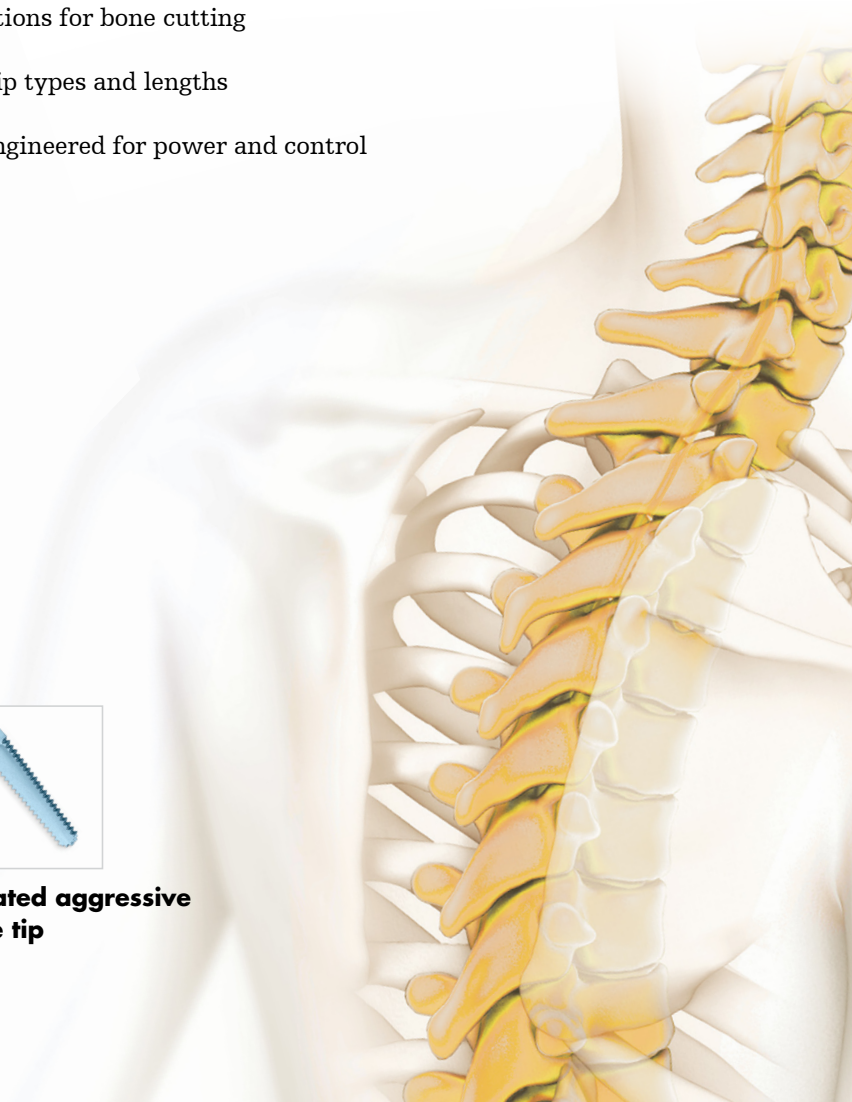

- Lightweight, ergonomic handpiece
- Angled and straight 25kHz models
- Nine tip options for bone cutting
- Variety of tip types and lengths
- Precision engineered for power and control

Delivering a superior experience

Through our people and products, we strive every day to enhance your efforts and optimize your results. With you, we're driven to make healthcare better.

Serrated aggressive knife tip

Ultrasonic bone cutting

Proprietary LT vibration technology

SONOPET Ultrasonic Aspirator masters fine bone and hard tissue dissection by coupling **longitudinal vibration** with **torsional oscillation** at 25,000 times per second. This patented innovation, precise control and ergonomic design let you emulsify bone with a high level of precision.

Cutting and protection combined

Because calcified and rigid structures don't absorb ultrasonic oscillation, SONOPET Ultrasonic Aspirator cuts bone cells smoothly and efficiently. Underlying soft tissue vibrates with oscillation and moves away from the vibrating tip and remains largely unaffected.

Unique advantages in tip design

Our claw tips decompress the nerve root while irrigating and aspirating simultaneously. Our knife tips make it easy to cut in a curved or circular path. Directed irrigation reduces necrosis and charring.
