

BACS[®]

Balance ACS

Empowering you to achieve **positive patient outcomes** throughout the continuum of spinal care

Streamlined **spinal care**

BACS is an integrated suite of products and services designed to help you get quality outcomes for your patients across the continuum of spinal care.

Step up your **spinal care**

BACS Assure

Everyone knows the value of data. The BACS Assure tool **simplifies data management by capturing and analyzing data** throughout the continuum of spinal care – it can provide you with insights that allow you to make the best treatment decision for your patients.

More info

BACS Accelerate

We know that payer requirements vary significantly and change frequently. BACS Accelerate **streamlines the entire pre-authorization process**, providing you with an easy, always-up-to-date checklist of payer- and patient-specific requirements.

More info

BACS Assist

Measure twice, cut once. BACS Assist is a **comprehensive pre-operative planning and implant selection tool**. It also allows you to create patient-specific rods tailored to your patients' specific needs.

Practical **considerations**

Implementation of BACS is seamless. It can be integrated into your IT system with minimal impact to your existing workflow. We will provide a dedicated team and partner with you to deliver all necessary training and ongoing support.

Data security is paramount

Contact details

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery.

The information presented is intended to demonstrate the breadth of Stryker product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. The products depicted are CE marked according to the Medical Device Directive 93/42/EEC. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.
