# Tornier Perform Humeral Stem

Our relentless pursuit of shoulder arthroplasty innovation continues. Elevated by Blueprint 3D Planning Software and the Tornier Perform Anatomic and Reverse Glenoids, the Tornier Perform Humeral Stem offers clinical solutions for your most simple to complex cases.

# Refined.

The Tornier Perform Humeral Stem was designed utilizing Blueprint 3D Planning Software and real-world clinical experience in shoulder arthroplasty to create patient-optimized solutions.

## Stem length

Available in short, long and XL stem sizes

## Multiple neck shaft angles

Symmetric and 10° poly inserts available for a 135° or 145° reverse neck shaft angle

## True metaphyseal fit

Tornier Perform Humeral Stem comes in standard and plus sizing to provide primary metaphyseal stability. Tier-shaped design maximizes contact with higher density peripheral bone.

## Four inlay collar sizes

Options of inlay collars designed to properly size from your smallest to largest patients

# Reproducible.

Intuitive instrumentation designed to offer consistent flow in the operating room and a variety of humeral options allowing to repeat your surgical plan, case after case.

1. Product sizes of Aequalis Reversed II

# Ready.

Backed by the Blueprint 3D Planning Software and the Tornier Perform glenoid portfolio, the Tornier Perform Humeral Stem provides clinical solutions, from simple to complex cases.

## Multiple construct options

Tornier Perform Humeral Stem allows for glenoid and humeral-sided soft tissue tensioning utilizing the Perform Reversed lateralized and augmented baseplates in combination with multiple sphere options.

## Elevated by Blueprint

Tornier Perform Humeral Stem is fully Blueprint enabled and leverages all features that aid in determining the optimal plan. Combining the Perform family of implants with Blueprint 3D Planning Software allows surgeons to assess their glenoid strategy, position the stem and review the full construct with Blueprint's advanced features.
